

Your Voice Counts

EuroPharm Forum Vision to Practice 2020 Consultation for a New Approach

3rd Announcement

The Executive Committee members are looking forward to discuss the future of the EuroPharm Forum with you. We need to hear your opinion, and all representatives will be consulted during the meeting!

The Executive Committee has explored the future perspectives of the Forum with much creativity and thoroughness, and your input can now serve to improve and add to the solutions and answers that have been identified.

Based on its deliberations so far, the Executive Committee suggests that the following issues be debated:

- Vision to Practice 2020 (strategy)
- The professional domains
- The work method
- The financial situation
- The professional secretariat
- Collaboration with the WHO Collaborating Centre
- Networking

In addition, members have asked to discuss:

- Membership
- 'Implementation network' as keyword for the EuroPharm Forum work

These topics are only suggestions, and more may follow. Most important is it that the discussions contribute to setting the future direction of the Forum.

If you are prevented from attending, please provide us with your opinion about the future of the Forum beforehand, so that the Executive Committee may take your voice into consideration, together with the output of the meeting.

Shortly before 26 May, registered participants will receive background information materials in preparation of the meeting.
